TECHNICAL DATA SHEET INSTANT PREPARATION OF DEHYDRATED YOGURT

Description: Instant preparation of dehydrated yogurt, high nutritional quality and with a shelf life of twelve months.

Nutritional values: It is produced with a probiotic, bifidus active of last generation: Bifidobacterium lactis, which improves and renews the intestinal flora.

Also it contains seven vitamins and four minerals:

- Vitamin A: It contributes to the normal maintenance of the vision.
- Vitamin B1: It contributes to the normal energy efficiency of metabolism
- Vitamin B5: It contributes to the normal intellectual performance
- Vitamin B6: It contributes to the normal function of Central Nervous System
- Vitamin B12: It contributes to reduce tiredness and fatigue

- Vitamin D: It contributes to the normal absorption of calcium and phosphorus
- Vitamin E: It is an excellent antioxidant
- Selenium: It contributes to the normal function of immune system
- Zinc: It contributes to the normal cognitive function
- Phosphorus and calcium: It helps strengthen bones

Healthy values: Increases immunity and helps in the treatment against gastritis. It maintains strong bones and teeth. Reduces the risk of intestinal decomposition and prevents constipation.

People with lactose intolerance can enjoy this yogurt without this affecting them, because the content of it is reduced when the fermentation of milk occurs.

Packaging technology: This package is designed to withstand large temperature differences and extreme conditions of transport. The composition of the package and its conditioning under nitrogen, allows for better preservation of the product, preventing oxygen permeability and water vapor, as well as possible changes caused by exposure to sunlight. Remains completely protected from the environment by ensuring the supply of vitamins and nutrients, preventing the formation of bacteria.

Instant preparation: It is prepared instantly in only three minutes, by rehydration with plain water at room temperature.

Pour the powder into a glass. Add water and stir. Cool to get a better taste.

Flavors: Natural, strawberry and vanilla / **Types of milk:** Whole and skimmed / **Texture:** For drinking and creamy

Formats: Single sachet (yogurt powder) and Mix-System sachet (yogurt powder and osmotic water)

The Mix System package is a new presentation with two watertight and independent compartments. One of them is the yogurt powder container and the other is the container of the exact amount of osmotic water for reconstitution. Both compartments are separated by a frangible weld and with light pressure in the area of water, you can make the mixture and prepare the yogurt easily.

This Mix System package ensures maximum quality and flavor of this dehydrated yogurt
